

## **Integrated Pest Management Parks Department**

### **Capital Fund & 2003A Bond Fund**

#### **Project Description**

In February 2006, the City Council approved the Pesticide Hazard and Exposure Reduction (PHAER) zone. The Parks and Recreation Department is using Agency funds to expedite improvements in the Redevelopment Project Area and facilitate Parks and Recreation's efforts to maintain City Parks and City properties in a "green" manner. A majority of the funding was earmarked for integrated pest management—sustainable improvements and \$20,000 has been designated for signage geared towards educating the public about the PHAER zone model and the City's green and sustainable efforts.
